- 100C3600BLA0H-1-8 X 36" L ANCHOR BOLT ASTM F1554 GR36 HDG 6" THD 4" HOOK HD GALV

- L-anchor bolts (or L-bolts) are essential heavy-duty fasteners used to secure structural and non-structural components to concrete foundations.
- Featuring a threaded shank with a bent "L" shape, they are cast-in-place before or during concrete pouring to provide high pull-out resistance via the bent portion. Common uses include anchoring sill plates, beams, and columns.
